**SDI Engineering**  
**NAICS # 541330**

SDI – Engineering department, is dedicated to serving the engineering, and design-build needs of government. Founded in 1994, we have developed through the years wide-ranging working relationships with several agencies and clients in the USA. Our specialties include engineering design for highways, interchanges, roadways and bridges, parking facilities, site plans, and site development. Our expertise extends to drainage and lighting design, communications and security systems. We are also fully experienced in field investigations and studies, the preparation of reports, budgets, estimates, and contract documents, and are prepared to work with our clients on identifying problem situations and recommending practical solutions.

**SDI Land Survey & Construction Layout**  
**NAICS # 541370**

SDI – Land Survey department, which was formed in 2009, is dedicated to providing clients with surveying services for design and construction layout projects. We provide measurements, calculations, and field work necessary to establish elevations, lines and grades. Our services also include topographic surveys, determining boundaries, writing descriptions of specific parcels of land and the installation and restoration of monuments.

**SDI Architecture**  
**NAICS # 541310**

SDI – Architecture department, which was formed in 1994, is dedicated to providing clients with solutions to their building needs that are economical, functional and aesthetically pleasing. We do this while maintaining control of a project's schedule, cost, construction and design. Private and government sectors in the USA have relied on SDI Architects to meet their physical and functional needs in a variety of projects. Our work has included homes, office buildings, warehouses, facilities for banking, educational, health, food processing, transportation, light and heavy industrial functions, laboratories, computer and employee facilities.

**SDI Construction Management**  
**NAICS # 541330**

Few owners possess the time, capability or total in-house staff capacity to follow through on the many phases of a construction project while simultaneously maintaining the normal flow of their primary business activity. Sensing this void in the corporate structure and the opportunity to serve SDI's design-build specialty - SDI Construction Management department was formed in 2003. Today, we are a firm with proven capabilities and a track record of success in providing complete construction service, which often involves bringing to life our engineering and architecture group's innovative designs.
