Mr. Oladeinde has over 26 years of continuous transportation engineering experience in civil and structural projects. As a manager he was responsible for project management, budget, quality control/assurance of Phase I, II and III - design and construction engineering of all highway projects.

As a project structural engineer, he has performed detailed structural inspections of highway bridges, Bridge Condition Reports, TS&L plans, Plan Development Outlines, bridge structural design for Seismic Performance Category B and service loads. He has developed structural plans for major and complex bridges, box culverts, retaining walls, and other roadway structures.

As a project civil engineer, he has conducted Phase I feasibility studies for reports. He has also developed, maintained and administered policies governing design and preparation of plans and specifications of highway designs, road and street horizontal and vertical geometry, pavement designs and drainage designs.

Mr. Oladeinde was the project manager/structural engineer for the following bridge and roadway projects:
